**Description of Event** (max. 250 words)

The 12-hour overnight hackathon is a dynamic and intensive event designed to bring together students from diverse technical backgrounds to collaborate, innovate, and develop practical solutions to real-world problems. Beginning at 10:00 PM, the event challenges participants to work in teams under time constraints, encouraging creativity, critical thinking, and effective problem-solving.

Participants are provided with problem statements at the start of the event and are expected to design, develop, and present a functional prototype or solution by the end of the hackathon. Throughout the night, mentors and organizers offer guidance and support, helping teams refine their ideas and overcome technical challenges.

The hackathon not only enhances technical and coding skills but also fosters teamwork, communication, and time management. It serves as a platform for participants to showcase their talents, explore innovative ideas, and gain hands-on experience in a competitive yet collaborative environment.

The event concludes with project presentations evaluated by a panel of judges based on creativity, feasibility, and impact. Winners are recognized and rewarded, making the hackathon a motivating and enriching experience for all participants.
